DATE MAILED: 07/08/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

,								
	Application No.	Applicant(s)						
	09/692,668	MUKAI ET AL.						
Office Action Summary	Examiner	Art Unit						
	Julio C. Gonzalez	2834						
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 3 rCPR 1:38(a). In no event, however, may a reply be limely flad after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than their (30) days, which the stabutory minimum of thirty (30) days, will be considered timely. - If the period of reply specified above is less than their (30) days, a story with the stabutory minimum of thirty (30) days, will be considered timely. - Failure to reply weight in the set or extended period for reply will by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply exceeded by the Critical lett than three months after the mailing date of this communication, even if timely filed, may reduce any samed patent term adjustment. See 37 CFR 1.704(b).								
1) Responsive to communication(s) filed on 16 J	lune 2003 .							
2a) ☐ This action is FINAL . 2b) ☑ Th	is action is non-final.							
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims								
4) Claim(s) 1.4.5.7.9.10,13,14,16 and 18 is/are pending in the application.								
4a) Of the above claim(s) is/are withdrawn from consideration.								
5) Claim(s) is/are allowed.								
6)⊠ Claim(s) <u>1,4,5,7,9,10,13,14,16 and 18</u> is/are rejected.								
7) Claim(s) is/are objected to.								
8) Claim(s) are subject to restriction and/o	r election requirement.							
Application Papers								
9)☐ The specification is objected to by the Examiner.								
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.								
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).								
11) ☐ The proposed drawing correction filed on is: a) ☐ approved b) ☐ disapproved by the Examiner.								
If approved, corrected drawings are required in reply to this Office action.								
12)☐ The oath or declaration is objected to by the Examiner.								
Priority under 35 U.S.C. §§ 119 and 120								
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).								
a) ☐ All b) ☐ Some * c) ☐ None of:								
 Certified copies of the priority documents 	s have been received.							
2. Certified copies of the priority documents have been received in Application No								
 Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rull of 17.2(a)). See the attached detailed Office action for a list of the certified copies not received. 								
14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).								
a) The translation of the foreign language provisional application has been received. 15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.								
Attachment(s)								
1) ∑ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s)								

Application/Control Number: 09/692,668

Art Unit: 2834

DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1, 4, 5, 7, 10, 13, 14 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ago et al (US 5,684,437) in view of Horiuchi (JP 409294045A).

Ago et al discloses a surface acoustic wave device comprising a piezoelectric substrate 5 having a pair of edges, an interdigital transducer 4 provided on main region wherein a distance L is between at least one inner edge and corresponding one of the substrate edges is about $\lambda/10$ to about 8λ (see figures 2, 4, 5). Also, the step depth is in the range of about 2λ to about 6λ (column 5, lines 47-49). Moreover the IDT has a plurality of electrode fingers (see figure 2 and column 2, lines 7-11).

However, Ago et al does not disclose having a substrate with a step formed extending from a substrate edge.

Application/Control Number: 09/692,668

Art Unit: 2834

On the other hand, Horiuchi discloses for the purpose of improving resonance characteristics with simplified structure, a resonator 11 having two IDT's 13 and 14 (see figure 9). Also, Horiuchi discloses having steps extending from substrate edges of the resonator 11 (see figure 4).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to design a surface acoustic wave as disclosed by Ago et al and to modify the invention by having a substrate with a step formed extending from a substrate edge for the purpose of improving resonance characteristics with simplified structure as disclosed by Horiuchi.

3. Claim 9 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ago et al and Horiuchi (JP 409294045A) as applied to claims 1 and 10 above, and further in view of Kadota et al (US 5,714,830).

The combined surface acoustic wave discloses all of the elements above. However the combined surface acoustic does not disclose that the fingers have different wavelengths. Art Unit: 2834

On the other hand, Kadota et al discloses for the purpose of reducing the manufacturing cost of surface wave resonators, outermost electrode fingers with a wavelength of about $\lambda/8$ and the other electrode fingers of about $\lambda/4$ (column 3, lines 42-48).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to design the combined surface acoustic wave as disclosed above and to modify the invention by using different wavelengths for the electrode fingers for the purpose of reducing the manufacturing cost of surface wave resonators as disclosed by Kadota et al.

Response to Arguments

4. Applicant's arguments with respect to claims 1, 4, 5, 7, 9, 10, 13, 14, 16 and 18 have been considered but are moot in view of the new ground(s) of rejection.

Application/Control Number: 09/692,668

Art Unit: 2834

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julio C. Gonzalez whose telephone number is (703) 305-1563. The examiner can normally be reached on M-F (8AM-5PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nestor Ramirez can be reached on (703) 308-1371. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7722 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
